

**CV**  
**Linnik Zakhar Petrovich**

**Date of birth:** 21.05.1988

**Education:**

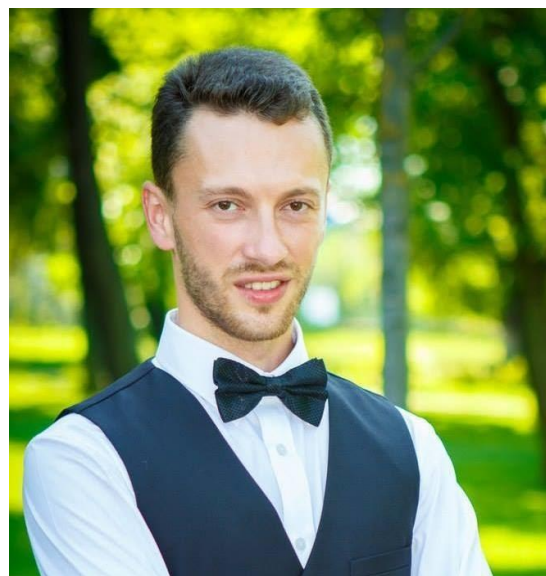

- Kharkiv Petro Vasylenko National Technical University of Agriculture.

Спеціальність: - Specialty: - Energy of agricultural production. (2005 - 2010)

- Kharkiv Petro Vasylenko National Technical University of Agriculture. Master's degree - Philosophy of management. UNESCO Department "Philosophy of Human Communication", philosophy and history of Ukraine. (2012-2013)

- Postgraduate studies. The Institute of Vegetable and Melon growing of the National Academy of Agrarian Sciences of Ukraine

Specialty: "Agronomy", (2018 - 2021)

**Employment**

2010 - 2019 - the Kharkiv Petro Vasylenko National Technical University of Agriculture for the following positions

- A second category specialist of the Department of Culture. (2010)
- An assistant of the Department of Cultural Universals. (2014)
- A leading specialist of the unit for the organization of educational work of students. (2019)

In August 2020, I was hired at the Institute of Vegetable and Melon growing of the National Academy of Agrarian Sciences of Ukraine as a junior researcher in the laboratory of selection of solanaceous and pumpkin crops. From August 2018 to August 2021, I was studying at a graduate school and according to an individual plan I carried out research on the topic "Starting material for heterosis selection of watermelon".

Since July 2021 my scientific work is related to the implementation of the task "Scientific and methodical aspects of the use of genetic source material in the creation of a heterozygous watermelon hybrid."

During the period of my work I made research results in more than 20 scientific publications that show the scientific results of research. And also, 15 patents of authorship certificates for co-authorship of watermelon hybrids and lines adapted to the forest steppe of Ukraine, which are included in the National Gene Bank of Plants of Ukraine.

During my work in the laboratory, I mastered a set of scientific work methods related to genetics, selection, and seed production. I participate in the development of scientific research plans, I make work calendars. I pay attention to the improvement of qualifications in the selection of vegetable plants.

**Personal qualities:** Initiative, responsible, sociable. I easily find non-standard solutions when solving problematic issues.

I have a desire to actively use my analytical skills and practical work experience when solving both problematic/difficult issues that arise for farmers during the cultivation of

agricultural crops, and when developing promising and high-margin directions for the production of vegetable products, and actively join the organization practical training for students of agricultural higher education institutions. Also, I take an active part in the cultural, educational, and organizational activities of the institute. I am a member of the council of young scientists of the institute.
